

501-15, environmental material analysis:

Description of component:	Weight [kg]:	Material:	% Recyclable
Lower and upper leg framework left and right	13,99	Folded steel 37-2	100%
Plastic guides and covers	0,04	>POM< >PEHD< Nylon	100%
Gears	1,42	Steel 70-2	100%
Drive shaft	0,54	Aluminium	100%
Gearmotor with wire	1,26	Aluminium Copper Steel Electronics	76% recyclable
Power supply with wires	0,46	Electronics Plastic	32% recyclable
Control panel with wires	0,14	Plastic Copper Switches	Non recyclable
Assembly bolts	0,37	Steel Nylon	100%
Finish	0,34	Powder coat	Non recyclable
Packing material	1,26	Carton recycled	100%
Total weight:	19,82		94% recyclable by weight
